TrueConect Modular Plug Crimp Tool, Modular Plug Connectors and Strain Relief Boots
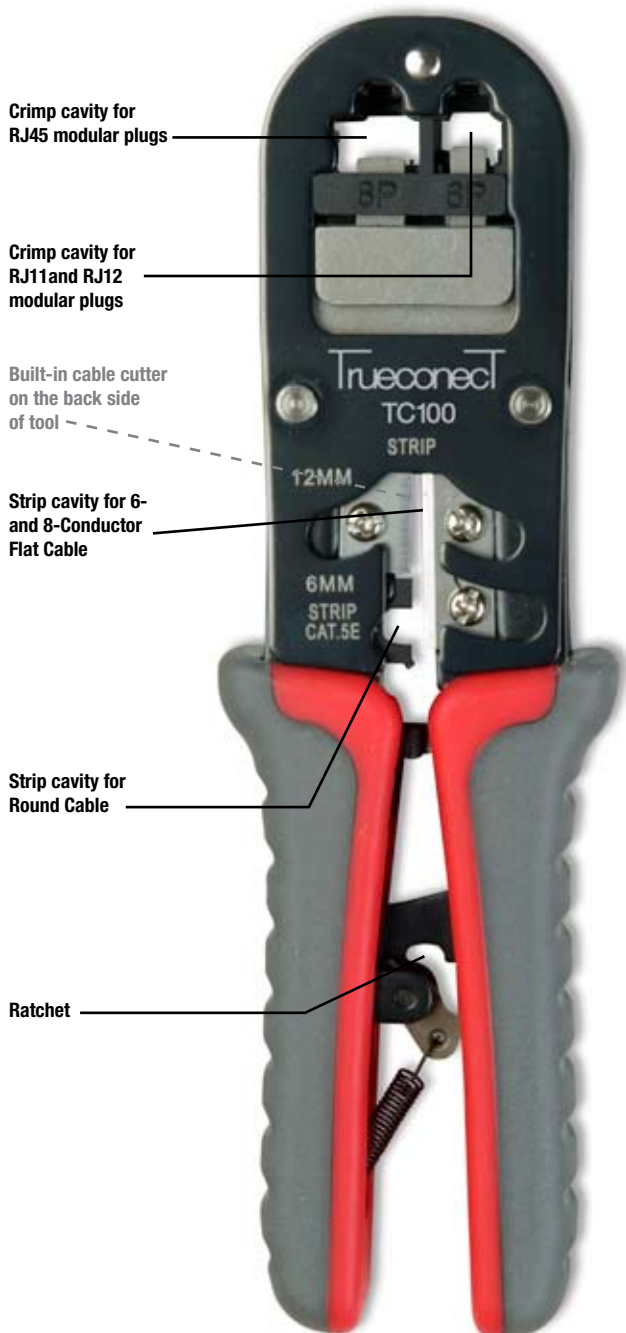

TrueConect's premium quality yet competitively priced modular crimp tool, series of modular plug connectors and strain relief boots are designed to out-live and out-perform competitive brands in day-to-day use.

TrueConect RJ45 and RJ11/12 Crimp Tool offers a smooth ratcheting cycle with multiple crimp cavities for both RJ45 and RJ11/12 modular connectors. Also included are stripping cavities for 6- and 8-conductor flat cable or round cable.

TrueConect Modular Plugs support Cat5, Cat5E and Cat6 shielded and unshielded cable and beat competitive brands in three very important criteria – performance, price and length of service. Each TrueConect modular plug offers 50µm gold plating. This, along with our polishing system provide a more durable performing modular plug contact. Modular plugs with less gold plating and that are not polished begin to show early signs of wear and tear in insertion and pulling lifecycle testing. The TrueConect advantage is a wider separation on the 3-prong contact, providing a surer grip and firmer connection. The RJ45 three-piece design provides easy installation and optimal performance.

TrueConect Strain Relief Boots provide protection on the modular plug connections plus color coding identification for large bundles of cables. These PVC Strain Relief Boots are for RJ45 Modular Plugs and are available in PVC and PVC + ABS providing a snagless full cover or just a snagless cover.
