

## ezTOOLS™ | Buffer Tube Midspan Access Tool

Buffer Tube Midspan Access Tool (1.8 to 3.0 mm)

*The simplest and most reliable midspan access tool for loose buffer tubes.*

### Overview

Prysmian's ezACCESS | Buffer Tube Access Tool provides quick and easy access to fibers every time. Designed for midspan entry in buffer tubes to access fibers, this is the one-stop tool for the veteran or the new installer.

Specially designed inserts hold the buffer tube firmly in place where a precision-ground blade "shaves" only the tube wall - providing reliable access without damage to the fiber or coating. An industry study revealed that Prysmian's ezACCESS Buffer Tube Access tool provides the most consistent, safe and reliable access while other tools frequently damaged fibers and / or coatings.

Interchangeable labeled inserts support a wide variety of buffer tubes sizes used for different fiber counts and cable designs. The tool's thick gauge steel alloy construction and a hard shell tote case mean years of reliable field use. These interchangeable inserts change in and out within 15 seconds.

### Kit Contains

- 1 Buffer Tube Access Tool with Carrying Case
- 3 Inserts (2.5mm / 2.7mm / 3.0mm - common sizes)
- Spare parts: 1 spare blade, 1 socket head screw

### Product Snapshot

**Applications** Reliable midspan entry to access fibers in loose tube cables. Easy change inserts for a variety of manufacturers' tube sizes.

**Cable Types** Loose Tube, ADSS, Microduct & Specialty

**Tool Type** One Hand Operation / Shaving Action  
Quick Change Inserts / Rugged

**Options** Kit (1 tool, 3 inserts, accessories) / Inserts (10) to fit a Variety of Buffer Tube Sizes
