Punchdown/Screwdriver Multi-Tool

1
Remove faceplate

2
Remove jack from faceplate

3
Punch down wire

Punch down wall jacks and patch panels with the convenience of a Klein multi-bit screwdriver/nut driver. Terminate and cut wire in one step on **wall jacks and 110/66 patch panels** with the included punchdown blade. This **interchangeable screwdriver/nut driver** comes with both Phillips and slotted screwdriver tips and converts to a nut driver in addition to a hex key. Designed for durability, this **all-in-one** tool is handy for work on many voice and data applications as well as electrical.

Features

- 110/66 combination cut-type punchdown blade with precision ground cutting edge
- Machine-tooled steel bits for superior strength
- Four screwdriver tips
- Two nut drivers
- One hex key
- Cushion-Grip handle for greater comfort
- Bayonet-style (twist & lock) socket accepts most manufacturers' punchdown blades
- Heavy-duty blade barrel provides storage for bits
- Tip-Ident[®] quickly identifies tool and size
- Counter display available
