Product Information

The IPA-Based Presat Wipes - *IsoClean* are a plastic-safe, non-corrosive, ESD-safe circuit cleaner that quickly and easily removes fluxes, pastes, light oils and grease, as well as organic residues. It is effectively used as a circuit cleaner and stencil cleaner.

MicroCare IPA-Based Presat Wipes - *IsoClean* are the strongest IPA-based cleaner on the market. While most IPA-based cleaners contain up to 30% water, this cleaner contains virtually no water and is undiluted by airborne humidity. 100% volatile, it evaporates cleanly with no rinsing required.

It is safe on all materials including components, connectors, cables and elastomers.

Money-saving refills reduce costs and help protect the environment by reducing waste and encouraging the re-use of packaging.
