

Designed with electricians in mind, this crimper is perfect for crimping 10-22 AWG insulated and non-insulated solderless terminals and connectors. This crimper also features the following:

- Tapered nose allows access in hard-to-reach places
- Wire cutter at tip of the head cleanly cuts 10-22 AWG wire
- Crimping head marked for insulated and non-insulated solderless terminals and connectors
- Thick plastic dipped handles provide extra grip and comfort
- Black oxide finish provides extra strength and durability
