

Cementex offers 1,000 Volt Rated insulated sockets for use with insulated tools including; Ratchets, Torque Wrenches, Extensions Bars, T-Handled Square Drives, Breaker Bars, etc.

With a quality and selection that is unmatched in the market place, we go the extra mile by utilizing our unique coating technique. This method allows the socket to be shaped in a way that allows maximum access to the tightest of places while providing the highest level of protection.

Flush Connect: a socket without the standard "Boot" that is incorporated into most Cementex sockets. This "Boot" serves to provide coverage protection to socket / ratchet / extension bar connection points. "Flush Connect" sockets are designed for use with Cementex Non-"X-Drive" and "X-Drive" Ratchets as well as other manufacturer's Non-"X-Drive" ratchets. "Flush Connect" Sockets, when used with an extension bar, should utilize a "Flared" extension bar. All 1/4" square drive sockets from Cementex are only offered as the "Flush Connect" style.

1/4" Square Drive: SAE
