

## FOC-300 – FIBER/KEVLAR SCISSORS

### Product Description:

Rust resistant, high-grade stainless-steel blades designed to cut Kevlar with an **integrated cable cutter**, allowing installers to also cut a variety of other materials including soft metals such as aluminum and copper.

**CAUTION:** This tool is NOT protected against electric shock and should NOT be used on live electrical circuits.

### Operating Instructions:

1. Grip tool in right or left hand and unlock by squeezing handles together to disengage locking mechanism.
2. When unlocked, the blades will open freely due to the unique spring-loaded design.
3. Trim Kevlar® central strength member using the lower serrated blade, which grips material in place and prevents sliding.
4. Lock tool with easy, one-finger operation to safely keep tool closed when not in use and to prevent blade edges from damage during storage.

### NOTE:

- Large, radial cutting notch can be used to cut fiber cable, individual fiber, Kevlar, fiber glass strength member, phone & data wire and many other soft copper or aluminum wire.
- **NOT** recommended for wire large than 6 gauge. **(NOT FOR STEEL)**
- Adjustable lock nut allows for tightening of scissors for longer tool life.
- Hole in front handle allows for carabine attachment.
- Use an industry approved cable gel cleaner or degreaser to clean residue on the cutting edges after use on cables containing water blocking gel.
