

### QbE® Cleaning System

Product# QbE, QbE-R, QbE-2,  
Pocket QbE

#### Product Description

The QbE Cleaning Platforms are the patented Precision Wipe System for cleaning fiber optic end-faces. They are self-contained cleaning tools that can be used wet-to-dry for the most thorough end face cleaning possible. The QbE is convenient and economical for use in field or OEM applications.

- Complete fiber optic cleaning system – no refills to buy or investment in expensive mechanisms to maintain
- Effective wet-to-dry Combination Cleaning™ - for cleaner, use Fiber-Wash MX pen for tough soils, Fiber-Wash AQ pen for eco-friendly cleaner, and Fiber-Wash NF pen for fast drying nonflammable cleaner.
- Provides the ideal cleaning surface – The QbE cleaning platen is perfect for outside plant or OEM application
- Convenient size – portable cleaning system easily fits on work benches
- Heavy duty lint-free wiping material – tough enough to remove buffer-gel; soft enough for all end-face cleaning. Won't shred or tear
- Patented - U. S Patent Number 6,865,770 and foreign patents

#### Typical Applications

QbE wipes are used in Fiber Optic and Telecommunications applications for:

- End-face connector cleaning
- Splice preparation
- Buffer gel removal

#### Compatibility

QbE wipes are compatible with most common solvents such as alcohols, hydrocarbons and chlorinated solvents. The wipes are also generally compatible with dilute or weak acids.

#### Typical Product Data and Physical Properties

QbE wipes are 100% noncontaminating material. These wipes have high absorbency and contamination entrapment capacity, as well as high wet strength.

- Excellent solvent resistance
- Excellent particle entrapment
- High absorbency capacity and rate
- Very low solvent extractables
- High wet strength

## QbE® Cleaning System

Product# QbE, QbE-R, QbE-2, Pocket QbE

### Availability

#### QbE Cleaning Platform

- 3" x 3" wipes, with 200 wipes per box and a flat cleaning platen
- For connectors without alignment pins
- Up to 800 cleaning per platform

QbE

#### QbE-R Cleaning Platform

- 3" x 3" wipes, 200/Box
- 3" x 3" wipes, with 200 wipes per box and a raised/ridged cleaning platform
- Cleans all FTTx connector geometries, including SC/LC, MT-Type, OptiFit, and e2000 by cleaning the entire connector
- Up to 800 cleaning per platform

QbE-R

#### QbE-2 Cleaning Platform

- 1.375" x 3" wipes, with 200 wipes per box and a flat cleaning platen
- For connectors without alignment pins
- Up to 400 cleaning per platform

QbE-2

#### Pocket QbE Cleaning Platform

- 1.375" x 3" wipes, with 200 wipes per box and a raised/ridged cleaning platform
- Cleans all FTTx connector geometries, including SC/LC, MT-Type, OptiFit, and e2000 by cleaning the entire connector
- Up to 400 cleaning per platform

Pocket QbE

## QbE® Cleaning System

Product# QbE, QbE-R, QbE-2, Pocket QbE

### Usage Instructions

#### Combination Cleaning with the QbE

- Pull one QbE Wipe over the fiber-safe foam platen.
- Hold the end face at a 90 degree perpendicular to the platen.
- Draw the end face lightly from the solvent wetted area to the dry area over the platen, using a smooth linear motion - do not press too hard.
- Do not retrace your cleaning procedure in the same area.
- Do not use a figure-eight motion; do not use a "twist & turn" motion.
- Check your work with a fiber scope or measuring device.

Combination Cleaning Process

#### For Splice Preparation

- Lightly moisten QbE wipe and gently wipe away fiber contaminants.
- Lightly dampen a 38540ESD swab, remove soil from V-grooves on fusion splicer.

#### Buffer Gel Removal

- Pull three single QbE Wipers out of the container.
- Spray a small amount of Electro-Wash PX Fiber Optic Cleaner into the folded wipers.
- Pull the cable through the first wiper and discard.
- Repeat until the cable "squeaks" clean.

### Technical and Application Assistance

Chemtronics provides a technical hotline to answer your technical and application related questions. The toll free number is: 1-800-TECH-401.
