

Connector Cleaning Tools

Clean all common connectors with these two cleaning tools. They feature a dry cloth designed to clean single fiber connectors residing in an adapter, faceplate or bulkhead. An easy push-action engages the connector, the system rotates 180° and an audible click is heard. Each unit provides over 525 cleanings.

CLETOP

Cletop® Classic Cassette Cleaners

The Classic Cletop series uses replaceable tape reels for economical cleaning. The compact and lightweight design is ideal for use in laboratories, assembly lines or in the field. Cletop cassettes offer consistent cleaning results without IPA alcohol which is toxic, flammable and leaves a residue on fiber ends. They have excellent anti-static properties that minimize reattachment of dust to ferrules after cleaning and make them suitable for static sensitive applications.

Clean 2.5-mm and 1.25-mm ferrules on a wide variety of connectors with Cletop's specially formulated 2-µm fiber weave dry cloth. This woven cloth is very effective in removing oil, grease and dust from ferrule surfaces and lifts all dirt through capillary action, trapping it in its micro pockets. The simple push button shutter operation exposes the cleaning tape. One tape reel gives over 400 connector cleanings.

CLETOP

Cletop-S® Cassette Cleaners

Cletop-S Series of cassette cleaners offers quality cleaning performance with a few design advances. The case has a slide open lock for easy access to replacement cartridges; they just drop in. The central push button makes it easy for both left and right handed operators to use. Both the cleaning cassettes and tape cartridges are made of anti-static material, so they're ideal for static-sensitive applications. The 2-µm fiber weave dry cloth lifts dirt, oil, grease and dust from ferrule surfaces through capillary action, trapping it in its micro pockets without using solvents. Each tape gives over 400 connector cleanings.

OPTIPOP

OPTIPOP R Cassettes

OPTIPOP R compact dry cloth cassette-style cleaners remove contaminants that come into contact with ferrules and negatively impact optical performance. All components are manufactured with antistatic materials, reducing the attraction of new debris. The ultra-clean micro-fiber cloth captures contaminants in a single pass, leaving no residue. Just one squeeze of the ergonomic lever advances and exposes the required amount of fresh fabric for each cleaning. Each tape gives over 400 connector cleanings.

| Stock No. | Part No. | Description | Price Each |
|-------------------------|----------|---|------------|
| 846X338 | 6338 | For all single fiber and female MT ferrule connectors | \$76.25 |
| 846X339 | 6339 | For male MTP/MPO connectors with pins | \$80.00 |
| 846X340 | 6340 | For male MT-RJ connectors with pins | \$80.00 |
| 846X437 | 6437 | Two slots for LC duplex connectors | \$80.00 |
| 846X232 | 6232 | Cleaning Cloth Replacement Reel, 1 ea. | \$20.75 |

Fiber Cleaning Pens are a simple option for cleaning connectors in adapters and exposed ferrules. They feature a push-style action with audible click that advances fresh cleaning tape for each use, delivering consistent cleaning results to fiber endfaces. Cleaning cloths are made of optical grade fibers which are highly effective at removing oils and contaminants. They are enclosed in a hard case with a dust cap that serves as an adapter for cleaning unmated connectors and cable assemblies.
