

Power and Utility Safety Equipment

Specialized is your Power and Utility Safety resource. We stock all of these products to support your PPE needs for the Power and Utilities markets.

The Compass™ Personal Voltage & Current Detector

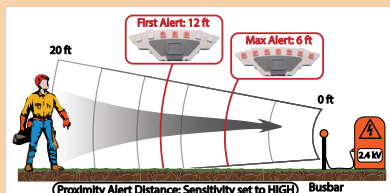

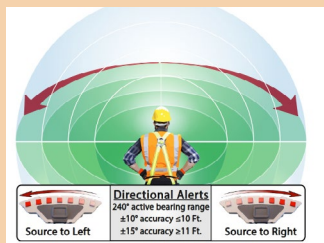

The Compass™ Personal Voltage & Current Detector is a smart life-saving device that detects energized sources and warns users long before they are in danger of being electrocuted. It alerts users of the proximity and direction of an energized source.

Compass™ is engineered to attach easily to the underside brim of any standard hard hat. Positioned within the user's peripherals, it is the first product of its kind to provide viewable alerts of any unseen electrical threats. This strategic placement allows it to provide a 360° detection area around the user. Once a threat is detected, Compass™ immediately provides the user with both audible and visual notifications.

- ✓ Improved Clips
- ✓ More sensitive if needed
- ✓ Easier to change and simple to change settings
- ✓ Smart adaptive feature when in use
- ✓ Water and dust resistant
